1

Serial No. 09/997,575  
Filed: 11/29/01

**Identification of the Claims Discussed:**

The independent claims were discussed.

**Identification of Specific Prior Art Discussed:**

U.S. Patent No. 5,978,016 to Lourette et al. (the "Lourette" reference) and Applicant Admitted Prior Art (AAPA) (Adobe Photoshop 6.0) were discussed.

**Identification of the Principle Proposed Amendments of a Substantive Nature Discussed:**

A new dependent claim specifying the set of format settings as being associated with display features of a receiving device was discussed.

**The General Thrust of the Principal Arguments of Applicant and the Examiner:**

Applicant's representative noted differences between the claimed invention and the applied art. In particular, Applicant's representative indicated that the applied art fails to teach or suggest applying a set of format settings at save time as claimed in the present invention. For example, with respect to claim 1, Applicant's representative explained that the Lourette reference and AAPA fail to teach or suggest, *inter alia*, in response to receiving a command from a user to save image data to a second location, presenting an interface for selecting a format profile comprising a set of image format settings, wherein the interface also includes a graphic actuator for receiving a command from a user to complete the formatting and saving of the image data to the second location.

**General Indication Of Any Other Pertinent Matters Discussed:**

Examiner Tang and Primary Examiner Donaghue kindly indicated that all arguments would be taken into consideration and a new search may be performed.

Respectfully submitted,

John Golian
